Introduction & Core Idea

Seekho-Sikhhao is a peer-to-peer micro-learning platform for IIT Jodhpur students to exchange practical, non-curricular skills. By hosting 10–40 minute sessions, students can earn micro-incentives (₹10–₹40) while fostering an affordable, inclusive, and collaborative campus culture.

Core Identity

- **Mission:** Turning campus knowledge into a shared community resource.
- **Format:** 10–40 minute skill-based sessions (Online/Offline).
- **Economics:** Learners get affordable access; tutors earn ₹10–₹40 per class.
- **Philosophy:** Inclusive, peer-driven empowerment where every student is both a teacher and a learner.

Problem Statement & Need

Despite a high-skill environment, IIT Jodhpur students face significant barriers to informal knowledge exchange. Here are the five key gaps:

- **Underutilized Talent:** Valuable peer skills in hobbies, tools, and crafts remain untapped.
- **Prohibitive Costs:** External professional courses are often too expensive and inaccessible.
- **Lack of Infrastructure:** There are no dedicated "safe spaces" for informal, non-academic learning.
- **Absence of Incentives:** Students have little motivation or reward for teaching their peers.
- **Social Silos:** Limited opportunities exist for cross-departmental networking and community bonding.

Community & Networking Impact

Seekho-Sikhhao bridges social and professional gaps, turning IIT Jodhpur into a more cohesive, collaborative ecosystem

Community & Social Integration

- **Breaks Silos:** Drives interdisciplinary interaction and cross-departmental networking.
- **Fosters Inclusivity:** Helps first-year students integrate by valuing diverse, non-academic talents.
- **Strengthens Identity:** Builds trust and a sense of belonging through shared, informal learning.

Professional & Growth Impact

- **Strategic Networking:** Connects students with potential teammates for projects, hackathons, and startups.
- **Soft Skill Development:** Boosts leadership, communication, and teaching confidence.

Proposed Solution & Key Features

Seekho-Sikhhao enables students to teach and learn short skill-focused classes within a trusted campus ecosystem.

Platform Capabilities

- Students create and teach micro-classes
- Learners book sessions instantly
- Supports online & offline learning
- Micro-payments reward instructors
- Trusted campus-based knowledge exchange

Core Features

Teach Module

- Create class listings with duration, price, mode & slots
- Participant limits & scheduling

Learn Module

- Browse & filter classes
- Instant booking functionality

"I Want to Learn" Board

- Post skill requests
- Peer responses & matchmaking

Payments & Rewards

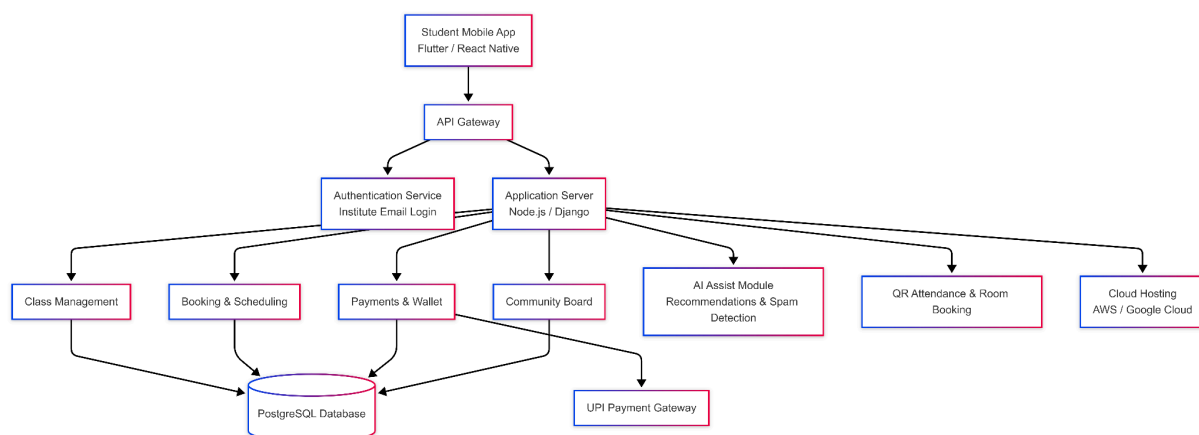

- Wallet-based micro-payments
- Transparent earnings dashboard
- Platform commission: 10-15%

Campus Integration

- Room booking support
- QR-based attendance verification

System Architecture & Technology

The Logical Flow (User-Centric)

6. Business Model & Value Proposition

Revenue Streams

- ₹1-₹5 commission per class
- Institutional partnerships
- Premium instructor visibility

Cost Structure

- Server & maintenance costs
- Payment gateway charges
- Moderation & support

Ethical Design & Responsible AI

Core Ethical Principles

- **Fairness & Value:** Ensures non-exploitative, transparent compensation and pricing for all instructors.
- **Privacy First:** Operates on a strictly consent-based data model.
- **Inclusivity:** Designed to be accessible to the entire IIT Jodhpur student body, regardless of discipline.

Responsible AI Framework

To maintain a peer-driven atmosphere, AI is used strictly for **operational efficiency**, not academic judgment.

Allowed (Optimization)	Restricted (Autonomy)
Bias-mitigated skill recommendations	No AI-driven grading or evaluation
Spam and fraud detection	No surveillance or tracking mechanisms
Automated scheduling optimization	No student performance ranking

8. Conclusion

Seekho-Sikhhao reimagines campus learning as a collaborative and community-driven experience. By enabling peer teaching, affordable skill exchange, and social engagement, the platform strengthens campus networks, promotes inclusivity, and builds a culture of shared growth. It empowers students not only to learn but also to lead, collaborate, and contribute to a thriving campus knowledge economy.
